

Article Summaries

I can...summarize a piece of recent science research from a reputable source and analyze that information and communicate it to my classmates

- 
- Practice communicating your article summary to someone near you for 5-8 minutes (keeping in mind I will likely ask YOU to present to the class)
 - Now we will hear from a variety of you about what you researched and talk about who cares...

Schedule

Reflections on Research

- **If you had to argue for it, why would you say it is important to do research?**
 - **What are some specific reasons you can think of to conduct research (think about different motives)?**
 - **Any questions you have about the hows and whys of research?**
-

HOMework – DUE MONDAY

- Watch Brian Cox's TED talk "Why We Need Explorers"
 - See my website for the link to the video...we may start watching it in class.
 - Write a 1/2 page response to what you watch
 - Remember...your notebook binders and the student survey are also due Monday!!!
-
